Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02. The oath or declaration is defective because the foreign priority claim made there does not match the claim in the application data sheet and in the parent International application.

Information Disclosure Statement

2. The information disclosure statement filed March 24, 2005 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

3. The listing of references in the Search Report is not considered to be an information disclosure statement (IDS) complying with 37 CFR 1.98. 37 CFR 1.98(a)(2) requires a legible copy of: (1) each foreign patent; (2) each publication or that portion which caused it to be listed; (3) for each cited pending U.S. application, the application specification including claims, and any drawing of the application, or that portion of the application which caused it to be listed including any claims directed to that portion, unless the cited pending U.S. application is stored in the Image File Wrapper (IFW) system; and (4) all other information, or that portion which caused it to be listed. In addition, each IDS must include a list of all patents, publications,

applications, or other information submitted for consideration by the Office (see 37 CFR 1.98(a)(1) and (b)), and MPEP § 609.04(a), subsection I. states, "the list ... must be submitted on a separate paper." Therefore, the references cited in the Search Report have not been considered. **Applicant is advised that the date of submission of any item of information or any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the IDS, including all "statement" requirements of 37 CFR 1.97(e). See MPEP § 609.05(a).**

Drawings

4. The drawings are objected to because they fail to show the limitations of claim 7. The only drawings (Figs. 11A-11E) showing the release recited in claim 1 are particular to an elastic coupling member. There are no drawings showing release with a plastic coupling member. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

Art Unit: 3679

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2, 3, 5, 7 & 8 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claims 2, 3, 5 & 8 each recite the limitation, “the projection”. It is not possible to determine which of the previously recited projections is “the projection”.

b. Claim 7 is directed to a coupling member designed to undergo plastic deformation. Its unclear how such a member would necessarily release the first pin as recited in claim 1. It would appear, that without elasticity, there would be no way to ensure the first pin were released before disconnect between the drive and driven members occurred. There certainly is no teaching in the specification for ensuring such release. Since it appears applicant contends that one skilled in the art would not need to be taught how to convert the disclosed elastic member into an inelastic one, it assumed that any elastic such member could also be made plastic.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1 & 5-9 rejected under 35 U.S.C. 102(b) as being anticipated by Araya, US 3,847,031. Fig. 9 shows a coupling member 34 comprising all the limitations of the claims.

9. Claims 1-9 rejected under 35 U.S.C. 102(b) as being anticipated by Padrun, US 4,617,775. Fig. 6 shows a coupling member 35 comprising all the limitations of the claims.

10. Claims 1, 5-7 & 10 rejected under 35 U.S.C. 102(b) as being anticipated by Glickman et al, US 5,427,559. Figs. 9 & 10 show a coupling member 66 comprising all the limitations of the claims.

11. Claims 1, 5-7 & 10 rejected under 35 U.S.C. 102(b) as being anticipated by Williams, US 6,189,187. Figs. 1 & 2 show a coupling member comprising all the limitations of the claims.

12. Claims 1 & 5-10 rejected under 35 U.S.C. 102(b) as being anticipated by Thorberg, US 3,847,031. Figs. 1 & 4 show coupling members comprising all the limitations of the claims.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Miller and Umemura each show a coupling member.
